

TIPS FOR RESIDENTS

Eclipse Begins 9:06 AM
Total Eclipse Occurs 10:19 AM
Total Darkness for 2.02 MINS

- Make sure you've purchased your solar eclipse glasses.
- Get your grocery shopping done about a week or more ahead of time. Not only will you beat the crowds, but this gives our stores time to restock.
- Pick up your prescriptions and/or medical supplies early.
- Get doctor/dentist appointments out of the way. It will start getting crowded the Thursday prior to the eclipse and could remain busy until the following Wednesday.
- Fuel up your tanks (gas, propane, etc.)
- Get Cash (ATM's may run out or be hindered by slow internet).
- Conserve water by not watering your lawn or using "extra" water during this weekend.
- Conserve energy by unplugging appliances you're not using and do laundry, use dishwashers, etc., at low peak hours.
- Be prepared for slow internet - you might not be able to stream your Netflix at peak times!
- Overall, supplies will be limited and high demand may mean you can't get all the things you need or want.
- Traffic will be heavy and lines for food and in stores will be long, so try to exercise patience.

Once the Eclipse begins, you'll forget all about the crowds and any small inconveniences it took for you to experience this wondrous event!
